Construction Notice

Overnight Lane Closures Planned for Northbound and Southbound I-805 and Westbound SR 54 Connector July 14-16

Beginning Sunday, July 14, SANDAG and Caltrans will be conducting nightly traffic closures of the outside lanes of both northbound and southbound Interstate 805 (I-805) between Sweetwater Road and Bonita Road. In addition, the on-ramp from Sweetwater Road to southbound I-805 and the westbound State Route 54 (SR 54) connector ramp from northbound I-805 will be closed. The closures will be in place from 9 p.m. to 5 a.m., Sunday, July 14, through Tuesday, April 16.

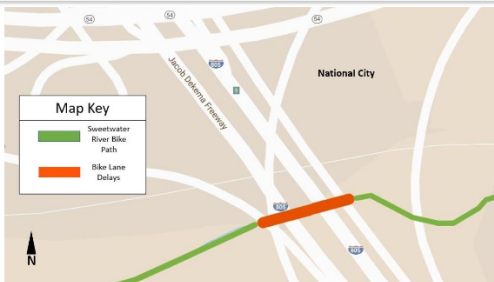

Northbound and Southbound Interstate 805 to State Route 54 Detour Map

Detours will be in place during the nightly closures. Motorists should take northbound I-805 and exit on East Plaza Boulevard. They will then continue to southbound I-805 from East Plaza Boulevard to access southbound I-805 or westbound SR 54.

Nearby residents can expect overnight work hours, noise, lights, and dust from these construction activities, which include Occupational Safety and Health Administration (OSHA) required vehicle back-up alarms. Crews will work to minimize noise and other impacts to nearby residents. Your patience is appreciated during construction.

Additionally, crews will be conducting drainage work under the I-805 Sweetwater River bridge that will result in intermittent delays for cyclists travelling along the Sweetwater River bike path. Crews will have flaggers in place to ensure access is maintained. These bike lane closures will be in effect for the next two weeks between Sunday, July 14, through Thursday, July 25, between the hours of 9 p.m. and 5 a.m.

ABOUT THE PROJECT

The I-805 South Corridor Enhancement Projects include the construction of sound walls, and bridge and safety improvements to the Sweetwater River Bridge. The project area spans more than three miles along I-805 from just north of East Naples Street in Chula Vista to SR 54 in National City. The projects build upon the I-805 South Express Lanes Project, a \$1.4 billion effort to create a modern new transportation backbone for South County. The improvements will help alleviate congestion, improve traffic flow, and enhance the quality of life for residents along this segment of the I-805 corridor.
